

Compact Design

WITH PRECISE LEVEL CONTROL

Puddle Pump Submersible

This Puddle Sucker Pump is able to pump water down to 1mm, which makes it suitable for pumping large and small areas of water.

This pump can operate for extended periods due to the high quality steel shaft, double mechanical seal and water & air cooling route to the top outlet.

- Auto and manual mode option designed for handling clean or dirty water
- Pumps 160 litres per minute
- Built-in thermal protection with auto reset
- Suitable for continuous duty up to 35°C
- Open impeller for 9mm soft solids passage
- Supplied with non-return valve and variable hoesetail as standard
